### Athletics of the Year

Readers of the Record will remember that during the past year no great successes crowned our efforts in athletics. The year 1919-20 found many of our men conditioned in their studies so that some of the best players were unable to compete in intercollegiate games under the rules now governing athletics. In addition the old traditions of victory seemed to have largely disappeared with the war. In consequence, both in football and hockey, the teams did not make a good showing. In 1920-21 the football team though made up of promising material, did only fairly, due chiefly to the lack of seasoning which experience gives. The U. N. B. game was tied and Acadia game lost. The hockey team though composed of individual stars did poorly, through disension among the players, losing both the U. N. B. and Acadia games.

These teams were all good teams. The most promising showing, however, was against the Wanderers in Halifax, the teams playing to a 0-0 tie. This same team came to Sackville somewhat late in the season and were beaten 6-0, which lead Mount Allison supporters to believe their team to have a good chance for the Maritime Championship. The Wanderers were looked upon as a very strong aggregation, and indeed, later won the Halifax City championship from the Crescents and Dalhousie by decisive scores.

The first intercollegiate game was between Acadia and U. N. B. and was won by the latter by a narrow margin. Following this came the U. N. B.—Mt. A. game in Fredericton. The game was played in a heavy snowstorm following several days of rain so that the field was in a terrible condition. The result was an unexpected defeat for Mt. Allison the score being 2-0. Spectators were constantly on the field and interfered with what the Mt. A. men regarded as a certain score. In consequence the game was protested but the protest was not allowed. The Acadia—Mt. A. game was played in Sackville and was won by Mt. A., by the score of 6-3.
This gave U. N. B. the Clarke trophy for the year. The play-off between the latter and Dalhousie was won by the latter by a very large score, after the latter had been easily defeated by the Wanderers. Few years have shown so many upssets in the calculations.

The prospects for a team at Mt. A. for next year are bright.

In hockey the year has been very successful. Starting with an almost completely new team the Summer cup was won and the Maritime Intercollegiate championship lost to Dalhousie, by the narrow margin of 1–0. Acadia won from U. N. B. at Wolfville by a small margin; U. N. B. defeated Mt. Allison in Fredericton 4–1, and Mount Allison easily defeated Acadia in Sackville, 6–1. This made the contest a three-cornered tie and since Acadia could not play further Mt. Allison and U. N. B. played off in Moncton to determine which team should play Kings for the Summer Cup. Kings had been a former competitor for that cup and the arrangement had been made for her to play the winner of Acadia—Mt. A.—U. N. B. games. The game with U. N. B. was a great exhibition of hockey and was finally won by Mt. A. by the score of 2–0. The game with Kings was played in Amherst and was won by Mt. A. 4–2 after a hard fought game.

This left Mt. A. to play Dalhousie, the winner of the Eastern League for the Intercollegiate championship. The game was played in Amherst, and no closer game of hockey has ever been played between the Maritime colleges.

The game was played for three periods without a score, and all accounts state that only the wonderful play of the Dalhousie goalie-keeper saved the Dalhousie team from defeat. In two periods over-time Dalhousie scored once giving her the game by the score of 1–0 and closing a season of very remarkable hockey.

The games have been noteworthy not only for the high class hockey but for the exceptionally clean quality of hockey as well, which reflects credit upon the spirit of good sportsmanship existing in the Maritime colleges.

The line up of the Mount Allison team is as follows: Appleby, goal; Jack Smith, A. Taylor, defence; Wyse, centre; T. Pickard (Capt.), Glennie, wings. Most of these men will be back next year and if eligible should make a very strong team.

In basketball the Mt. Allison team was defeated by U. N. B. and won from Acadia. U. N. B., also won from Acadia thereby winning the championship.

THE ENGINEERING SOCIETY

The Engineering Society was organized some twelve years ago, and has had a comparatively steady growth ever since. It is open to all engineering and B. Sc. students and this year had a membership of some seventy-five, of whom about twenty are on the B. Sc. course. Meetings have been held every two weeks and the Society has been fortunate enough to secure speakers for most of its meetings. Before Christmases two members of the faculty gave addresses, Dr. Bigelow on "Canadian Chemical Industries" and Prof. Fraser on "Municipal Water Supply". One of our own graduates, Mr. F. G. Green, returned for a visit in the second term and gave a very interesting talk on the Albert County oil shale development. Mr. Williams, of the Electrical Engineering staff of the C. N. R., Moncton, also spoke to the Society on "Modern Electric Welding". An arrangement was made with the Moncton Branch of the Engineering Institute of Canada whereby two meetings of that Branch were held in Sackville, in connection with our Engineering Society, during the second term. The members of the Moncton branch, some twenty-five in number, had dinner with the engineering students in the Residence. This was followed by a joint meeting of the Branch and Society in the Science Building. Mr. Gage, Chief Electrical Engineer of the C. N. R., gave a talk on "Electric Railway Signalling" at the first meeting, and Mr. McBeath, Assistant City Engineer of Moncton, on "Municipal Engineering" at the second. These meetings proved very instructive and were much appreciated, as was shown at the last meeting by an unanimous vote to continue the arrangement, next year, should it still be agreeable to the Moncton branch. A dinner, to be held the latter part of April, when prominent engineers of the Maritime Provinces will give short addresses, will bring to a conclusion the activities of the year.

PERSONALIA

DR. J. CLARENCE WEBSTER'82

On March 22nd, Dr. Webster delivered in Beethoven Hall, an interesting illustrated lecture on James Wolfe. He gave a brief outline of the main events of Wolfe's career, his love episodes as well as his heroic exploits, down to the last fatal combat on the plains of Abraham. Following this came a splendid series of views—largely portraits of Wolfe and various military and political celebrities of his time. Among them were excellent pictures of the generals from whom Moncton and Sackville were named. Of these eighteenth century portraits Dr. Webster has recently made considerable study and has collected some most interesting specimens.

Dr. Webster is one of Mt. Allison's most distinguished graduates. After taking his B. A. degree he entered on the study of medicine in the University of Edinburgh. Among the men who were also then studying medicine at Edinburgh were R. N. Bell of St. John, now a doctor in Colorado; Robert Jardine of Rexton, N. B. now a doctor and medical professor in Glasgow; the late Dr. Galus T. Smith, of Moncton, and the late Dr. Arthur Morrow, of Halifax. Dr. Webster became one of the best known students in his department, was awarded a bursary, and became an Assistant to Dr. Barbour, with whom he published a well-known medical book. After several years in Edinburgh, Dr. Webster came to Montreal and was associated with the Royal Victoria Hospital. From there he was...
called to the head of a department at Rush Medical College in Chicago, and
spent fifteen or twenty years there, becoming widely known for his skil-
ful hospital work.

He meanwhile did not lose touch with his native province. He came
back for the summer to his former home in Shediac where he acquired
the old homestead and some neighboring
property. There he has built a splendid residence which with its
large and beautiful gardens, park, boat houses, etc., makes an ideal
country home. He has now given up
work in Chicago and will spend his
time largely in Shediac with trips
South or abroad for the winter
months.

Especially in recent years Dr. Web-
ster has become interested in the
history of the Maritime Provinces, and
is devoting his time and energy to an
effort to reconstruct the teaching of his-
tory in the schools, so that it may
make more impression on the boys and
girls of the present than it made on
him when a boy at school. To this
end he has joined school authori-
dees in Middleton to import from Eng-
land a large number of valuable pic-
tures of people and historical events
for use in the public schools. He has
presented large groups of similar pic-
tures to the Shediac schools and is en-
couraging the Shediac trustees to
emulate their neighbours in the coun-
try. It seems as if Dr. Webster’s en-
thusiasm and knowledge were finding
a splendid outlet which is likely to be
of incalculable benefit in bringing new
historical outlook to the school-child-
ren of our province.

H. W. COWPERTHWAIT 
D. B. ’03

Mr. Cowperthwaite, who has had a
long and distinguished career in the
ministry in Nova Scotia and New-
foundland, recently celebrated the
eighty third anniversary of his birth.
He has been spending the winter with
his sister Mrs. Archfeld, of Thoru. Dr.
Cowperthwaite is the only living mem-
ber of his class, and only five Mount
Allison men are older living grad-
uates of Mount Allison than himself.
These are Hon. Josiah Wood ’63, the
oldest living graduate, Dr. A. D. Mar-
ton ’64 of Toronto, Judge Samuel A.
Chesley ’64, Mr. Seward S. Toddiags
’64, Afd. Dean R. C. Weldon ’64 retired,
Dean of the Batougwe Law School.

RAY L. ALLEN ’17, M. A. ’19

Mr. Allen is this year Instructor in
Physics at Western University, Lon-
don, Ontario, Previous to taking this
position he taught in a preparatory
school in Winnipeg. He was married
in July last to Miss Fanny Lewis, L.
C., ’16, at Tuket, N. S.

W. M. RYAN ’94

Mr. Ryan, who for two years has
filled the position of pastor of the
Sackville Methodist Church has ac-
cepted a call to the church in Char-
lottetown, one of the largest and
most active churches in the Maritime
Provinces. Mr. Ryan has filled the
position at Sackville with great satis-
faction to the people of the town as
well as the college and will be greatly
missed by the many friends he has
made in Sackville.

BONA MILLS ’16

For several years Miss Mills has
been Secretary of the Y. W. C. A. in
Charlottetown and has recently been
promoted to a similar position in Hal-
ifax. Her brother Harry Mills ’20 is
an instructor in the Sydney Academy.

H. S. B. STROTHARD ’04, B. D. ’08

Mr. Strothard, after the Christmas
holidays began his work at Mount Al-
ison as Professor of Religious Edu-
cation. The greater part of the year
he spends in Sunday School work in the
Maritime Provinces as part of his duties
in connection with his appointment.

NEHEMIAH AYER ’64, M. D.

Dr. Ayer died at his home in Wood-
stock, N. B., in January, at the age of
seventy-four. He was one of the
four graduates of 1864, the second
graduating class of Mount Allison. Of
the other three, two are dead, Dr. J.
R. Ince, former President of the Lad-
dies’ College, and later of the Univer-
sity who died in 1912; and A. A. Stock-
ton, LL. D., ’04.

LOUIS A. BUCKLEY ’12

For a number of years Mr. Buckley
was engaged in Boys’ Work in Nova
Scotia, for a time in charge of
Tuxis work for the Methodist church
and later as Secretary of the Y. M. C.
A. in Halifax. He has now been pro-
moted to the position of National
Boys’ Work, Secretary for the Cana-
dian Y. M. C. A. with headquarters
in Toronto.

LORNE LEA ’19

Mr. Lea is Instructor in Science at the
Methodist College, Newfoundland.
Last year he spent in graduate work
in Chemistry at Harvard holding at
the same time an Austin Teaching
Fellowship. He expects to return there
next year to complete his studies.

MARY E. PICKARD ’17

Miss Pickard has just graduated in
nursing from the Victoria General
Hospital in Montreal. Graduating
with her were her cousin Alice Pickard
L. C. of Sackville and Miss Helen
Hutchings L. C. of St. Johns, Nfld.

ATHLETIC RULES

Since 1916 Mount Allison, Acadia
and U. N. B. have required certain
scholarship standards of all men who
compete in intercollegiate athletics.
These rules were formulated by the
faculties and are administered by
them. At Mount Allison they have, on
several occasions, prevented men
from competing who were good ath-
letes but the number has decreased
from year to year so that it seems
justified in concluding that they act
as a deterrent upon the neglect of col-
lege work, to which of course athletics
must be secondary. They have had the
effect, too, of allaying much of the
suspicion which formerly existed as
to the bona fides of many who com-
peted in college athletics.

GEORGE E. RACKHAM ’17

Mr. Rackham who graduated in 1920
as of the class of 1917 was recently
appointed a missionary in West China.
Mr. Rackham's course was interrupted for three years by service overseas. On his return he completed his work in Theology and in Arts. He is a young man of excellent ability and strong personality and is a splendid addition to the large number of Mount Allison men and women who have dedicated their lives to the cause of foreign missions. Mr. Rackham is now a student in Victoria College, Toronto University.

RAYMOND C. ARCHIBALD '94

Professor Archibald who is professor of Mathematics at Brown University was, in June, 1931, elected to honorary membership in the Harvard chapter of Phi Beta Kappa, the national scholarship fraternity of the United States. At the present time he is on leave of absence from Brown and is spending part of a year in visiting mathematicians and universities in Italy, France, Belgium, Holland, Scandinavia, and Great Britain. At the meeting of the American Association for the Advancement of Science, which met in Toronto during the Christmas holidays, he was elected president of the American Mathematical Society, the largest mathematical society in the world.

In order to provide an enduring memorial for the 127 Field Service men who lost their lives in the great war, "American Field Service Fellowships" were established for citizens of the United States. The fellowships for 1932-33, not to exceed 25 in number, are each to consist of $200 plus $10,000 francs. A candidate may apply for a fellowship in any one of 31 fields of study. The awards are made early in 1932 on the basis of the advice of referees. Professor Archibald has been appointed the referee for mathematics.

CHAS. ROBB, ENG. '07

Mr. Robb graduated in engineering at McGill after finishing his work at Mount Allison. He then spent a year in graduate work at the Massachusetts Institute of Technology and later went to Alberta University as Professor of Engineering. The following newspaper clipping has something to say about him.

"When Sir Ernest Shackleton, the famous explorer, starts the engines of his motor sleds and boats with comparative ease in the deadly cold of the Antarctic regions it will be because of the inventive genius and persistency of Professor Robb of the University of Alberta and the members of the Associated Aero Research Committee of the Canadian Air Board. Acting in cooperation with the board officials Professor Robb has perfected an ether preparation the use of which permits the ready starting of motor engines at 37 degrees below zero. The formula for the preparation together with Christmas greetings and best wishes have been cabled to Sir Ernest Shackleton, who is now on his way south to the Antarctic ice field."

CHARLES W. FORSTER '01

The following clipping from the New York World is concerning Mr. Forster of the class of 1901, who for several years has been an Episcopalian clergyman in Newport, R. I. "The Rev. Charles W. Forster, rector of Emmanuel Episcopal Church, Newport, has accepted the call to Christ Church, New Brighton, S. I., and will assume charge of the parish Jan. 1. This, the Feast of the Circumcision, and falling on Sunday, will close the rectorearthly time which this important parish has been undergoing since the Very Rev. Duncan H. Brown left it to assume the Deanship of Grace Cathedral, Denver. The new rector of Christ Church is a Canadian, but has been in the United States about ten years. He is unmarried and his aunt keeps house for him. Besides being considered a very strong preacher, he is a great organizer and is particularly interested in boys' and young men's work."

REVIEW OF THE YEAR 1907

L. M. Colpitts, a member of the class of '03, who has produced so many scholars and teachers, was himself a teacher for several years in New Brunswick, Saskatchewan and British Columbia. Intermittently he indulged in various business projects, in lumbering, ranching and keeping store. In 1915 he enlisted, soon reached the front, but was wounded severely in the arm, after a few months. He then spent a considerable time in various hospitals and was instructor in Mathematics on the staff of the Khaki College, at Epsom. After returning to Canada in 1918, he was married and became secretary of the Municipal District of Sounding Creek, Alberta. He then entered on the study of law and recently passed his final examinations, taking first place in the province. He and another returned soldier are entering into a partnership with offices in Red Deer and an adjoining town. His motto might well be the familiar lines from Addison's Cato: 'Tis not in mortals to command success, But we'll do more, Sempronius, we'll deserve it.

JENNIE L. JOHNSON, CANADIAN LITERATURE FUND

Rev. C. H. Johnson '88, and his brother are founding a fund in memory of their mother, by which a considerable number of volumes of Canadian poetry and prose will be added to the library. This is a fine memorial which might well find imitators in other classes.

HAROLD G. BLACK '07

Mr. Black who is teaching in Los Angeles has in a recent number of the California Christian Advocate an interesting article on the Pacific Palisades, a sort of elaborate Chantauqua Park for residence and instruction which is being organized near Los Angeles.

BRIEF ITEMS

Rev. E. Baines '11, pastor of Victoria Church, Sydney has accepted an invitation to the Bridgewater, N. S. circuit for the coming Conference year. Mrs. Baines, a graduate of the Ladies' College in piano in 1905 and
in vocal in 1911 is vice-president of the Sydney Carol Union.

Miss Mary Allison '16, travelling secretary of the Canadian Girls in Training, with headquarters in St. John, N. B., spent a week in Sackville during the recent Student Christian Association conference.

Cyril Wilson Eng. '22, is in charge of the power house and battery section of the wireless station at Halifax.

Chester Harris '19, M. D. '14, (Edin.), has been taking a graduate course in England. He served with distinction in the Medical Service during the war.

Rev. R. C. Tait Thool. '19, is stationed on the Marvyn circuit at Napanee, Ontario.

R. K. Purdy Eng. '21, after taking a course in the Regina Normal School accepted a position as teacher at Lorneburn, Saskatchewan.

Rev. J. E. Peters '96, has been appointed as Conference Archivist for the Hamilton, Ontario conference. He is now stationed at Bartonville, Ontario.

Rev. G. Stanley Helps '16, who for some years was a member of the N. B. and P. E. I. conference is now stationed at Somersworth, New Hampshire.

Miss Ruth Humphrey '20 is teaching in the Mount Royal High School, Montreal P. O.

Rev. S. H. Irving '11 is stationed on the Upper Circuit in Alberta. This is his seventh year in that appointment. He is a brother of Will Irving '12, former Rhodes Scholar from Mount Allison and now vice-principal of the Aberdeen School in Moncton.

R. Pike ('17), after completing his engineering work at Mount Allison spent two years in Forestry at U. N. B., graduating there last May with high standing in his work. He is now with the Saskatchewan Forestry Department in North Saskatchewan.

Fraser Munro '18, has been forced by ill health to give up his work at Harvard. Last year he spent in study at Victoria College, Toronto. At Harvard he was working for his Ph. D. degree.

Frances Dargie '21 is spending the year at her home in Annapolis, N. S., and teaching in the Academy there.

Miss Helen MacMillan is teaching in Montreal.

Ralph Hayes '10, is employed with the J. M. Humphrey Co. of St. John.

Don Humphrey '23, is in the Bank of Montreal, St. John, N. B.

W. A. Burbidge '19, is at Victoria College, Toronto.

J. R. Barcaucough '20, is city salesman for the J. C. Green Millinery Co. of Toronto.
